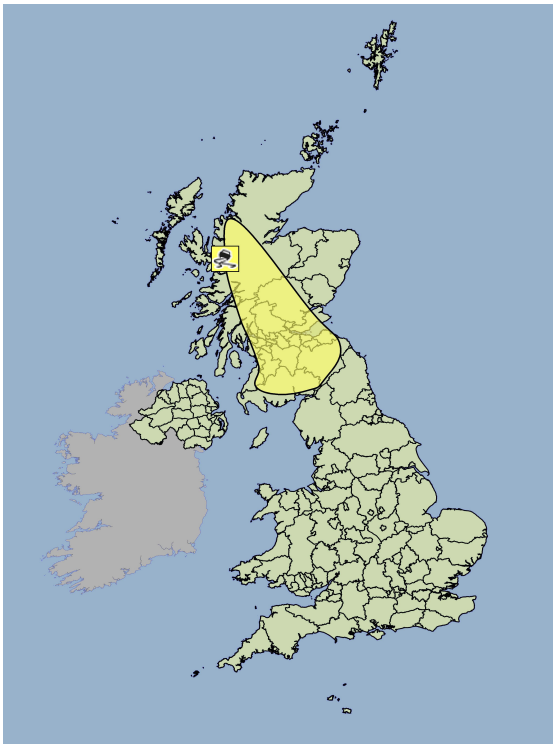
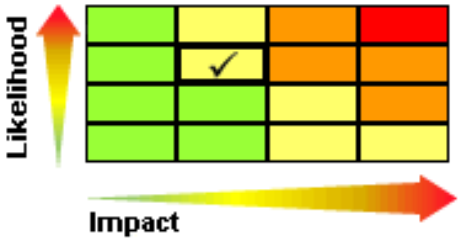
National Severe Weather Warning Service





Chief Forecasters Assessment
The cold spell is coming to an end, with a front expected to arrive from the Atlantic on Thursday morning. However, mild air will arrive at higher levels first, bringing the potential for rain to freeze as it encounters the chilly, low-level air.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **03:00 on Thu, 21st Jan 2016** until **13:00 on Thu, 21st Jan 2016**

A widespread frost is expected across Scotland with most surfaces below freezing. Patchy rain will move in overnight and during Thursday morning with a risk of rain falling onto frozen surfaces. Ice will readily form on untreated surfaces. Locally, some light snowfall is also possible.

Please be aware of the potential for some difficult driving conditions.
